Annandale Family and Sports Chiropractic 5/07

**ANNANDALE FAMILY & SPORTS CHIROPRACTIC
INFORMED CONSENT FORM**

As with any healthcare procedure, I understand that there are certain complications, which may arise during chiropractic manipulation, and that those complications include: fractures, disc injuries, dislocations, muscle strain, Horner’s syndrome, diaphragmatic paralysis, cervical myelopathy and costovertebral strains and separations. Some types of manipulation of the neck have been associated with injuries to the arteries in the neck leading to or contributing to serious complications including stroke. Some patients will feel some stiffness and soreness following the first few days of treatment. I understand that fractures are rare occurrences and generally result from some underlying weakness of the bone. I also understand that stroke and other complications are also generally described as “rare.”

Doctors of Chiropractic, Medical Doctors and Physical Therapists using manual therapy treatments for patients with headache and cervical spine (neck) complaints, are required to specifically explain that there have been rare cases of injury to a vertebral artery as a result of treatment. Such an injury has been known to cause a stroke, sometimes with serious neurological damage. The chances of this happening are estimated to be approximately from 1 per 400,000 treatments to 1 per 10 million treatments.

Appropriate tests and history will be performed to help identify if you may be susceptible to this type of injury; you will be notified if that is the case. If you have any questions about this, please do not hesitate to speak with your Doctor of Chiropractic.

In signing this document, I in no way compromise my protection against negligence.

I have read and understand the above statement and hereby consent to treatment.

Attention Medicare Patients

It is Medicare's policy to pay for **only** acute care. Medicare requires an appropriate examination to document that an acute injury or an acute exacerbation of a chronic recurrent condition has taken place, and that treatment is necessary for this acute injury. Dependent upon the nature of the injury, the acute phase of care may last a few weeks to a few months. Once this phase of care is complete, Medicare will not pay for any further treatment as it will be considered chronic or wellness care. Though an exam is required to document the need for acute care, **it is Medicare's policy**, not to pay for these examinations. As this is a chiropractic clinic, coverage of examinations may be different than coverage at a medical clinic.

As Medicare is a federal program, we are no longer allowed to give a discount on treatment services rendered to Medicare patients.

It is Medicare's policy only to cover chiropractic treatment of the spine. This does not include treatment of the shoulder, elbow, hands, hip, knee, feet or jaw. Medicare does not cover adjunctive therapies such as heat, ice, ultrasound, electrical muscle stimulation, or nutritional supplementation.

If you disagree with Medicare's policies, please contact them at 1-866-359-1598 to voice your concerns.

A copy of Medicare's policies regarding "Maintenance Therapy", "Treatment Parameters, and "Non-covered Services" as it pertains to Chiropractic healthcare will be provided to you upon your request.

Thank you
